### THE CORAVIN

Wine served with our Coravin system offers a unique and innovative way to enjoy wine without fully uncorking the bottle.

Our Coravin device uses a needle to pierce the cork, allowing wine to be poured out while preserving the remaining contents. This technology ensures that the wine inside the bottle remains untouched by oxygen, preventing oxidation and maintaining its original flavor profile and quality over an extended period.

As a result, our customers can savor a single glass of wine without committing to finishing the whole bottle in one sitting, making it an ideal choice for sampling rare or more expensive wines without compromising their integrity.

# ***THE POST OFFICE***

The building you are in now was built in 1928 following the greater demand on Melbourne's postal service with the expansion of a new city.

The asset was constructed on what is now one of Melbourne's most sought after and well-known boutique shopping strips, and was held by Australia Post until December 2005.

Since then, this freestanding Prahran icon has been treated sensitively to retain and incorporate the original post office façade.
